<sup>4</sup>For one year

### The benefits of a Hungarian residence permit

Residency via business ownership is the most efficient method of acquiring Hungarian/Schengen Residency for yourself and your family. You need to have EUR ~30,000 liquid to support the initial operation of your newly formed Hungarian company, which must remain operational as long as you want to remain a resident in Hungary. By acquiring residency in Hungary through business ownership, you and your family will be able to travel freely to and within the Schengen zone, and take advantage of Hungary's low living costs, favorable business environment and central European location.

### Business plan for the residency application

A business plan is the blueprint of your company; it shows what steps you are going to take to start your operation and make your business profitable. The authorities will consider all aspects of your business plan when deciding whether to grant or extend your Hungarian residence permit. You must provide documentation to support your claims, and demonstrate that your plan is realistic, and the business is compliant with all regulations and has a reasonable chance for success.

### What makes an office virtual?

The virtual office is an office where your company is registered and where official Hungarian letters are sent. Competent staff receives your mail and forwards it to the right person (e.g. your accountant). When needed, they provide a short English summary for you. However, you should not expect to spend time in this office.

### Why to choose a physical office?

It offers you a space where you can spend time on your own or with your clients. Having a physical office will also contribute to opening a corporate bank account at a local bank (which is compulsory), since it proves to the bank that you are committed to operating a viable company in the local market.

### Travel assistance

One of our colleagues will help you find your flight and book a hotel for your stay in Hungary.
