#### What is the "client gate" in Hungary and why do I need it? What is a virtual office?

Hungary. It lets you take care of paperwork online or make appointments at public records offices. It is also essential for getting your company registered for e-Government (which is compulsory). This second portal lets you access official mail from authorities.

It is an online platform for electronic administration in It is an office where your company is registered and where official Hungarian letters are sent. Competent staff forwards them to the right person (e.g. your accountant), with a short English summary when needed.

### Why to choose a physical office?

It offers you a space where you can spend time on your own or with your clients. This will also contribute to the Hungarian bank account opening procedure, since it proves to the bank that you are committed to operating a viable company in the local market.
